

SUBSTANCE MISUSE REHABILITATION IN TAYSIDE

A major redesign of the methadone prescribing and support element of NHS Tayside Drug Problem Service is underway. A partner is sought in the provision of support, counselling and therapeutic interventions for people in Tayside who are in receipt of medical treatments for their substance misuse problems and who require support to rehabilitate their lives.

This is an exciting opportunity for a service provider to join existing partnerships across Tayside and work in close collaboration with Tayside Drug Problem Service and General Practitioners. Invitations to tender are extended to not for profit/independent/voluntary sector organisations who are able to demonstrate both their expertise in this field and the capacity to establish and maintain a service across the whole of Tayside.

Potential providers should contact Ms Frima Strachan, Supplies Department, Ninewells Hospital, Dundee, DDY 9SY on Tel 01382 632130 or e-mail: frima.strachan@tuht.scot.nhs.uk by 18th February 2005 to receive formal invitations to tender and details of the service to be provided.
