(1) Drugs are seized in a variety of forms but where possible, for the purpose of this table, amounts have been converted to weights (kg), except for LSD and ecstasy-type drugs which are shown in thousands of doses. Seizures of unspecified quantities are not included. There may be differences between tables due to rounding.

(2) As a seizure can involve more than one drug, figures for individual drugs cannot be added together to produce totals.

(3) MDMA prior to 1996.

(4) Includes Opium, Pethidine.

(5) Measured in thousands of doses.

(6) No HM Revenue and Customs data are available for 1994 to 1999.

(1) As a seizure can involve more than one drug, figures for individual drug classes cannot be added together to produce totals.

(2) Seizures from joint operations involving HM Revenue and Customs and the police are generally recorded against HM Revenue and Customs.

(3) HM Revenue and Customs changed their data base system in 2001. Data before 2000 is not available.

(1) Some of the figures differ slightly from HM Revenue and Customs' own figures because of differences in the treatment of information, mainly revisions to weights, which became available after publication.

(2) HM Revenue and Customs data is not comparable with previous publications as data representing seizures earlier than 2000/2001 as the system used (DCIS) was only seen to be the standard repository of seizure data nationally from 1999/2000 onwards. Seizures from joint operations involving HM Revenue and Customs and the police are generally recorded against HM Revenue and Customs.

(3) Drugs are seized in a variety of forms but where possible, for the purpose of this table, amounts have been converted to weights (kg). Seizures of LSD and MDMA are given in doses. Seizures of unspecified quantities are not included.

(4) Thousands of doses.
