

NOTES FOR PUBLICATION

Figures at both Health Board and Alcohol & Drug Action Team (ADAT) level have been presented in this publication. The Key Findings discussed below refer to Health Board level data only.

Drug Treatment Waiting Times Information Framework Report July to September 2010

This publication presents data from the Drug Treatment Waiting Times Information Framework. It includes details on the number of clients waiting and the time waited for (1) clients to be offered an assessment date, (2) clients to be offered an appointment date for their first intervention and (3) clients to be offered an appointment date for specific interventions (namely: structured preparatory & motivational intervention, prescribed drug treatment, community based support/ rehabilitation and residential rehabilitation).

Waiting times are important to patients and are a high profile measure of how NHS Scotland is responding to demands for services. These waiting times statistics provide a wide range of users with a clear picture of one aspect of NHS performance across Scotland.

On 13th November 2009, a national HEAT (Health improvement, Efficiency, Access, Treatment) target was announced that by March 2013, 90% of people who need help with their drug problem will wait no longer than three weeks for treatment. As a first step to this target it is expected that by December 2010, 90% of clients will be offered an assessment date that falls within 4 weeks of the referral date and 90% of clients will be offered a treatment date that falls within 4 weeks of the assessment date.

Since 2004, drug treatment services have routinely collected data on waiting times. The data is submitted to local teams, formerly Alcohol and Drug Action Team (ADATs), now Alcohol and Drug Partnerships (ADPs), who are responsible for assuring data quality; these teams feed the data into local databases, which generate summary reports each quarter. The summary reports are then sent to ISD, where they are collated, aggregated, and then published on the ISD drugs misuse website.

Operational structures have changed since October 2009, when the 22 ADATs were dissolved and replaced by 30 ADPs, the majority of which are at local authority level, rather than NHS Board level. The Waiting Times Framework was designed to function at ADAT level and will continue to report on an ADAT-based geography, additionally aggregating to a Health Board-based geography, until April 2011 when a new data collection system will be in place facilitating reporting at ADP level.

Since March 2010 the Drug Treatment Waiting Times report has been published at both Health Board and ADAT level. As data is submitted to ISD at ADAT level data has been aggregated to produce Health Board level comparison.

Further background information on the Waiting Times Information Framework can be found in Annex 1. Annex 2 contains details on how the information presented has been calculated.

ISD has developed a new system which allows submission of data securely to ISD over the web, and will be fully rolled out by 1st April 2011. The new database will also have the facility for services to upload data extracted from local systems. One of the benefits of the new system is that it enables the addition of new data items to measure the full wait from referral to treatment for both drug and alcohol services. It will also collect information on where clients *could not* or *did not* attend offered appointments and will calculate the time clients wait

for treatment. ISD are currently in the process of rolling out the new system. The first reporting period for the new system will be April to June 2011 and this will be reported on in September 2011. At this point trend data will no longer be published as it will not be comparable to data from the old system.

Interpreting the data

Caution is recommended when interpreting these statistics. The number of services submitting data varies significantly from area to area and within areas across the data collection period (see Table 13). This quarter Argyll & Bute ADP did not submit data due to ADP compliance and quality issues. Data for NHS Lothian and the Lothians ADATs (East Lothian, Edinburgh City, Midlothian and West Lothian) is shown only for Referral to Assessment and for Assessment to Treatment due to data quality issues with individual treatment data. Forth Valley are now submitting only data for Tier 3 & 4 services, as specified by the A11 HEAT target. Therefore July – September 2010 Forth Valley data is not comparable with previous quarters.

It should also be noted that there is a wide range of demand for substance misuse services across Scotland, and to meet this demand, an equally variable set of practices across the country. In some Alcohol and Drug Action Team (ADAT) areas, the impact of a single specialized service – for example, a crisis management centre – may dramatically alter the distribution of waiting times. Consequently, to compare data across ADATs or Health Boards is potentially inappropriate.

The tables include small numbers for some ADATs and Health Boards; caution is therefore recommended when interpreting differences in percentages.

Key Findings

Time waited from referral to assessment date offered

Offered an assessment date:

- In Jul-Sep 2010, approximately 86% of those offered an appointment for assessment were offered a date which fell within the reporting period and was within 4 weeks of referral (Table 1).
- Between Jul-Sep 2010 there were 9 Health Board areas (Dumfries & Galloway, Forth Valley, Greater Glasgow & Clyde^s, Highland^s, Lanarkshire, Orkney, Shetland, Tayside, Western Isles) where 90% or more clients were offered an appointment date for assessment within 4 weeks of referral (Table 1).
- Almost 73% of those offered an appointment for assessment were offered a date which fell within the reporting period, Jul-Sep 2010, and which was within 14 days of referral (Table 1).
- Between Jul-Sep 2010 there were 6 Health Board areas (Dumfries & Galloway, Forth Valley, Greater Glasgow & Clyde^s, Lanarkshire, Shetland, Western Isles) where at least 80% of clients were offered an appointment date for assessment within 14 days of referral (Table 1).

Still waiting for an assessment date to be offered:

- Of those who were still waiting for an appointment for assessment, almost 11% had waited more than 26 weeks by the end of September 2010 (Table 2).
- Of those who were still waiting for an assessment appointment at the end of September 2010, Lothian (18%) and Ayrshire and Arran (12%) had the highest percentage of clients who had waited more than 26 weeks (Table 2).

Time waited for first intervention

Offered an appointment date:

- In Jul-Sep 2010, nearly 97% of those offered an appointment for treatment were offered a date within 4 weeks of the date a care plan was agreed (Table 3).

- Between July and September 2010, nearly all Health Boards had 90% or more clients offered a treatment appointment within 4 weeks of the date a care plan was agreed. Only Forth Valley had a lower percentage (89%).
- Over 90% of those offered an appointment for treatment were offered a date which fell within the reporting period, Jul-Sep 2010, and which was within 14 days of the date a care plan was agreed (Table 3).
- Between Jul-Sep 2010 there were 5 Health Boards (Ayrshire & Arran, Borders, Greater Glasgow & Clyde^s, Lanarkshire, Tayside) where over 90% of clients were offered a treatment appointment within 14 days of the date a care plan was agreed (Table 3).

Still waiting for an appointment date to be offered:

- Of those who were still waiting for a treatment appointment at the end of the reporting period, Just over 3% had waited more than 52 weeks by the end of September 2010 (Table 4).
- Of those health boards presented, only Forth Valley and Lothian had more than 10% of clients who were still waiting for an appointment at the end of September 2010 had waited for more than 26 weeks (17% and 34% respectively) (Table 4).

Time waited for structured preparatory intervention

Offered an appointment date:

- In Jul-Sep 2010, almost 99% of those offered an appointment for structured preparatory treatment were offered a date which fell within the reporting period and was within 4 weeks of the date a care plan was agreed/ date client was ready for second treatment (Table 5).

Still waiting for an appointment date to be offered:

- Of those who were still waiting for an appointment for treatment, nearly 7% had waited more than 26 weeks by the end of September 2010 (Table 6).
- Nearly 47% of those who were still waiting to be offered an appointment had waited 14 days or less by the end of September 2010 (Table 6).

Time waited for prescribed drug treatment

Offered an appointment date:

- In Jul-Sep 2010, nearly 96% of those offered an appointment for prescribed drug treatment were offered a date which fell within the reporting period and was within 4 weeks of the date a care plan was agreed/ date client was ready for second treatment (Table 7).

Still waiting for an appointment date to be offered:

- Of those who were still waiting for an appointment for treatment, just over 4% had waited more than 26 weeks by the end of September 2010 (Table 8).
- Almost 38% of those still waiting to be offered an appointment had waited 14 days or less by the end of September 2010 (Table 8).

Time waited for community based support

Offered an appointment date:

- In Jul-Sep 2010, just over 95% of those offered an appointment for community based support were offered a date which fell within the reporting period and was within 4 weeks of the date a care plan was agreed/ date client was ready for second treatment (Table 9).

Still waiting for an appointment date to be offered:

- Of those who were still waiting for an appointment for treatment, almost 14% had waited more than 26 weeks by the end of September 2010 (Table 10).
- Just over 37% of those still waiting to be offered an appointment had waited 14 days or less by the end of September 2010 (Table 10).

Time waited for residential rehabilitation

Offered an appointment date:

- In Jul-Sep 2010, just over 97% of those offered an appointment for residential rehabilitation were offered a date which fell within the reporting period and was within 4 weeks of the date a care plan was agreed/ date client was ready for second treatment (Table 11).

Still waiting for an appointment date to be offered:

- Of those who were still waiting for an appointment for treatment, 25% had waited more than 26 weeks by the end of September 2010 (Table 12).
- Of those still waiting to be offered an appointment 25% had waited 14 days or less by the end of September 2010 (Table 12).

§ Based on partial data submissions, please see ADAT compliance section below for further information.

ADAT compliance

Table 13 in both the ADAT & Health Board workbooks shows that the number of services returning data within each ADAT varies over time. It is important to take account of this information when interpreting data on trends.

ADATs are asked to encourage services to submit data. The substance misuse team at ISD continue to monitor the number of services submitting data and provide additional training where necessary.

Additional Information

As ISD only receive aggregate data from each of the ADAT areas, it is not possible for us to validate the data. Detailed questions regarding local data should be addressed to the relevant ADAT/ ADP.

Annex 1: Background information on the Waiting Times Information Framework

The National Waiting Times Information Framework was introduced in April 2004. The main aim of the framework was to give ADATs overall responsibility for local monitoring of treatment services.

The benefits of the framework are:

- ADATs will be able to utilise waiting times information to monitor equity of access for drug users across their local area.
- ADATs will be able to use waiting times information to hold meaningful, informed discussions with agencies about blockages in the system.
- ADATs will be able to ensure that attention/resources are focused on areas with the longest waiting times.
- ADATs will be able to review waiting times for assessment and consider the disparity in lengths of assessment processes.
- ADATs will be able to identify treatment 'types' that have the longest wait.
- ADATs will be able to consider the drop out rates of clients referred for drug treatment.
- ADATs will be able to consider the length of time clients attend particular services.

The benefits of ADATs having overall responsibility for monitoring waiting times are:

- ADATs will be able to ensure that the waiting times dataset is included in any local information system development.
- Agencies will regard reducing waiting times as a local priority.
- Monitoring waiting times will be viewed as a local initiative and not as 'another national return'.
- ADATs will receive monthly returns automatically rather than having to wait for reports from ISD/SG.

In February 2007, ISD provided ADATs with a revised data collection system. The revised system now allows ADATs to produce a wider range of reports and also provides them with the facility to monitor data quality more easily.

Annex 2: Method of calculation

Missing submissions from ADAT's are represented as greyed out fields in the tables. Where no clients have been seen, or there are no clients waiting for a specified intervention, zeros have been used. Asterisks (*) indicate values that have been suppressed due to potential risk of disclosure.

Table 1: Referral to assessment: offered

Time between date referral received/first contact and the first appointment date offered for assessment.

Percentages shown are based on the total number of clients who have been offered an appointment.

Table 2: Referral to assessment: still waiting

Time between date referral received/first contact and the end of the reporting period.

Percentages shown are based on the total number of clients who were still waiting for an appointment at the end of the reporting period.

Table 3: Time waited for first intervention (any): offered

Same as Table 1 but showing the time between date care plan agreed/decision on treatment is made and the appointment date offered for any first intervention.

Table 4: Time waited for first intervention (any): still waiting

Same as Table 2 but showing the time between date care plan agreed/decision on treatment is made and the end of the reporting period.

Table 5: Time waited for structured preparatory intervention: offered

Same as Table 1 but showing the time between date care plan agreed/decision on treatment is made/date client ready for treatment and the appointment date offered for structured preparatory intervention either as a first or second treatment.

Table 6: Time waited for structured preparatory intervention: still waiting

Same as Table 2 but showing the time between date care plan agreed/decision on treatment is made/date client ready for structured preparatory intervention either as a first or second treatment and the end of the reporting period.

Table 7: Time waited for prescribed drug treatment: offered

Same as Table 1 but showing the time between date care plan agreed/decision on treatment is made/date client ready for treatment and the appointment date offered for prescribed drug treatment either as a first or second treatment.

Table 8: Time waited for prescribed drug treatment: still waiting

Same as Table 2 but showing the time between date care plan agreed/decision on treatment is made/date client ready for prescribed drug treatment either as a first or second treatment and the end of the reporting period.

Table 9: Time waited for community based support: offered

Same as Table 1 but showing the time between date care plan agreed/decision on treatment is made/date client ready for treatment and the appointment date offered for community based support either as a first or second treatment.

Table 10: Time waited for community based support: still waiting

Same as Table 2 but showing the time between date care plan agreed/decision on treatment is made/date client ready for community based support either as a first or second treatment and the end of the reporting period.

Table 11: Time waited for residential rehabilitation/ detoxification: offered

Same as Table 1 but showing the time between date care plan agreed/decision on treatment is made/date client ready for treatment and the appointment date offered for residential rehabilitation/ detoxification either as a first or second treatment.

Table 12: Time waited for residential rehabilitation/ detoxification: still waiting

Same as Table 2 but showing the time between date care plan agreed/decision on treatment is made/date client ready for residential rehabilitation/ detoxification either as a first or second treatment and the end of the reporting period.

Annex 3: Revisions to reporting of Drug Treatment Waiting Times Information with effect from June 2009

ISD revised the format of the publication on drug treatment waiting times in June 2009. The revisions were made in order to improve the clarity of the information presented and to mirror as closely as possible other ISD waiting times publications. The changes relate to the presentation of the data only and have no effect on the underlying data collected.

1. Summary of changes

1.1 Tables presented

Previous format	New format
Time from referral to assessment	Time from referral to assessment is included but the calculation of waits has been amended in line with other ISD waiting times publications (see table 1.2 below)
Time from care plan agreed until date appointment offered for <u>any</u> intervention.	Time from care plan agreed until date appointment offered for <u>any</u> intervention. Also, for specific interventions: Time from care plan to <ul style="list-style-type: none"> • structured preparatory & motivational intervention • prescribed drug treatment • community support/ rehabilitation • residential detox/ rehabilitation

1.2 Calculation of time waited

Previous format	New format
Separate information was presented on those offered an assessment/ appointment date within the time period and those still waiting for an assessment/ appointment date at the end of the time period. <i>Clients Offered:</i> Data was presented on numbers offered within <=14 days, 27-52 weeks and >52 weeks. Percentages were calculated out of all those clients offered within the reporting period. <i>Clients Still Waiting:</i> Data was also presented on numbers still waiting >14 days, 27-52 wks and >52 wks at the end of the reporting period. Percentages waiting 27-52 wks and >52 wks were calculated out of those waiting >14 days at the end of the reporting period.	Separate tables are still presented on those offered an assessment/ appointment date within the time period and those still waiting for an assessment/ appointment date at the end of the time period. <i>Clients Offered:</i> Data is presented on percentages offered within <7 days, 8-14 days, 15-21 days, 22-28 days, 5-8 wks, 9-12 wks, 13-26 wks, 27-52 wks and >52 weeks. These are calculated out of all clients offered within the reporting period. <i>Clients Still Waiting:</i> Data is presented on percentages still waiting <7 days, 8-14 days, 15-21 days, 22-28 days, 5-8 wks, 9-12 wks, 13-26 wks, 27-52 wks and >52 weeks. These percentages will be calculated out of all clients still waiting at the end of the reporting period.

If you have any queries regarding the above revisions please contact NSS.ISD-DATWT@nhs.net.

Source: Summary information provided by Alcohol and Drug Action Teams

No data provided.

[Please see Notes for further information](#)

1 Source of information

Database	
Scottish Drug Treatment Waiting Times Framework	23 Alcohol and Drug Action Teams collect waiting times data from drug treatment services in their local area and submit aggregated data to ISD

2 Notes on interpretation

- a Number offered (assessment date): For those offered an assessment date during the reporting period - time between date referral received / first date of contact and first appointment date offered for assessment.
- b Number waiting (assessment date): For those still waiting to be offered an assessment date - time between date referral received / first date of contact and the end of the reporting period.
- c Number offered (any first intervention): For those offered an intervention date during the reporting period - time between date care plan is agreed / decision on treatment is made and the first appointment date offered for any intervention (includes first treatment only).
- d Number waiting (any first intervention): For those still waiting to be offered an intervention date for first intervention - time between date care plan is agreed / decision on treatment is made and the end of the reporting period (includes first treatment only).
- e Number offered (interventions 1 to 4): For those offered an intervention date during the reporting period - time between date care plan is agreed / decision on treatment is made / date client ready for treatment and the appointment date offered for the specific intervention (includes both first and second treatment).
- f Number waiting (interventions 1 to 4): For those still waiting to be offered an intervention date for a specific intervention - time between date care plan is agreed / decision on treatment is made / date client ready for treatment and the end of the reporting period (includes both first and second treatment).
- g Intervention 1 = structured preparatory intervention, intervention 2 = prescribed drug treatment, intervention 3 = community based support and rehabilitation, intervention 4 = residential rehabilitation and detoxification.
- h The Scotland figure is an aggregate of the information provided from ADAT's. It should be noted that the number of services submitting data varies significantly from area to area and within areas across the data collection period.
- i Data is submitted by NHS services and non-NHS services (local government, voluntary sector)
- j These statistics do not originate at ISD. ADATs collect and quality assure data, and submit aggregate reports to ISD each quarter. Data quality varies extensively across ADATs. Caution is therefore recommended when interpreting these figures.
- k The sum of number clients offered / waiting for the four interventions will not equal the number offered / waiting for any first intervention as a client can be offered / waiting for more than one intervention.

For some clients the type of intervention may be missing. In these cases the client will be included in the total for 'any' first intervention but not in any of the totals for specific interventions. This means that the total for 'any' first intervention may exceed the sum of the totals for the four specific intervention types.

ISD is working with ADATs to improve data quality, which will resolve this issue.

Source: Summary information provided by Alcohol and Drug Action Teams

[Please see Notes for further information](#)

1 Source of information

Database	
Scottish Drug Treatment Waiting Times Framework	23 Alcohol and Drug Action Teams collect waiting times data from drug treatment services in their local area and submit aggregated data to ISD

2 Notes on interpretation

- a Number offered (assessment date): For those offered an assessment date during the reporting period - time between date referral received / first date of contact and first appointment date offered for assessment.
- b Number waiting (assessment date): For those still waiting to be offered an assessment date - time between date referral received / first date of contact and the end of the reporting period.
- c Number offered (any first intervention): For those offered an intervention date during the reporting period - time between date care plan is agreed / decision on treatment is made and the first appointment date offered for any intervention (includes first treatment only).
- d Number waiting (any first intervention): For those still waiting to be offered an intervention date for first intervention - time between date care plan is agreed / decision on treatment is made and the end of the reporting period (includes first treatment only).
- e Number offered (interventions 1 to 4): For those offered an intervention date during the reporting period - time between date care plan is agreed / decision on treatment is made / date client ready for treatment and the appointment date offered for the specific intervention (includes both first and second treatment).
- f Number waiting (interventions 1 to 4): For those still waiting to be offered an intervention date for a specific interevention - time between date care plan is agreed / decision on treatment is made / date client ready for treatment and the end of the reporting period (includes both first and second treatment).
- g Intervention 1 = structured preparatory intervention, intervention 2 = prescribed drug treatment, intervention 3 = community based support and rehabilitation, intervention 4 = residential rehabilitation and detoxification.
- h The Health Board and Scotland figures are calculated from aggregating the information provided by ADAT's. It should be noted that the number of services submitting data varies significantly from area to area and within areas across the data collection period.
- i Data is submitted by NHS services and non-NHS services (local government, voluntary sector)
- j These statistics do not originate at ISD. ADATs collect and quality assure data, and submit aggregate reports to ISD each quarter. Data quality varies extensively across ADATs. Caution is therefore recommended when interpreting these figures.
- k The sum of number clients offered / waiting for the four interventions will not equal the number offered / waiting for any first intervention as a client can be offered / waiting for more than one intervention.

For some clients the type of intervention may be missing. In these cases the client will be included in the total for 'any' first intervention but not in any of the totals for specific interventions. This means that the total for 'any' first intervention may exceed the sum of the totals for the four specific intervention types.

ISD is working with ADATs to improve data quality, which will resolve this issue.
